WATER COOLED CABLES REPAIR SERVICE

ARC.ITEC™ : Water cooled cables repair service

The water cooled cables are a vital component of your equipment. That's why it is important that the repair of your worn cables is made by a specialist working in a quality, competence and speed approach.

With this mindset, **E.ITEC® offers its repair service** including:

- The re-hosing of the cables (this operation can also be done on-site by our technicians or your own staff trained by E.ITEC®);
- The replacement of the copper ropes;
- The replacement or the recovery of the cups, the connecting lugs or the complete terminals.

EITEC® guarantees your productivity by minimizing down-time of your cables thanks to a fast and customized answer.

Re-hosing

New conductors

Recovery of terminals

Let us manage the repair of your cables by sending them to one of our workshop:

E.ITEC® repairs water cooled cables whatever their design or brand:
